MOUTHPIECES

FOR COLD CONDITIONS

Start playing and have an immediate pleasant, warm feeling. Perfect notes right from the beginning.

ALLERGY SUFFERERS

Ideal for all players with metal allergies.

CLEANING

Mouthpieces can be cleaned simply with hot water and a brush. Less adherence of dirt than on metal mouthpieces.

TURBO BLOW

Brand mouthpieces are equipped with the patented Turbo Blow twist for a fuller sound and increased volume. Just blow it!

turb@blow

Size	Shank	Characteristics
4A	S / M / L	Wide cup for a full sound. Most commonly used for euphoniums and bass trombones.
6.5A	S / M / L	Rich, mellow and strong tone and comprehensive, voluminous sound. Very popular with allrounders.
7C	S / M / L	For players who prefer a medium-sized cup for a large tonal volume and brilliant sound.
10C	S / M	Pleasant, solid and smooth sound with excellent projection for playing in all ranges.
12C	S / M	Narrow cup ideally suited to high registers. Helps players with heavy and soft lips to reach high notes.

Shank sizes S / M / L

Can be used on trombones, euphoniums, baritones, bass trombones etc...
