MOUTHPIECES

## FOR COLD CONDITIONS

Start playing and have an immediate pleasant, warm feeling. Perfect notes right from the beginning.

## ALLERGY SUFFERERS

Ideal for all players with metal allergies.

## CLEANING

Mouthpieces can be cleaned simply with hot water and a brush. Less adherence of dirt than on metal mouthpieces.

## TURBO BLOW

Brand mouthpieces are equipped with the patented Turbo Blow twist for a fuller sound and increased volume. Just blow it!

**turb@blow**

Size	Characteristics	Cup
1 1/4C	for powerful players, compact sound	low
1 1/2C	popular all-round mouthpiece, brilliant sound throughout all ranges	medium low
3C	relatively large cup produces a full tone, slightly narrower than 1 ½ C. Very popular among brass musicians across a wide range of musical styles.	medium low
5C	for players with a good embouchure, comfortable rim and lively sound	low
7C	the mouthpiece with the brilliant tone that is popular all around the world	low
1 FS	very comfortable, great response with clear and clean sound even in high ranges, popular lead mouthpiece	flat
Jazz	warm, substantial sound, excellent all-round mouthpiece for jazz musicians and soloists	medium low
Groove	very comfortable to play, great response, clear and clean groovin' brass sound	medium low
Lead	excellent projection, for playing throughout all registers, especially for lead trumpet	flat
Scream	very flat cup, perfect for lead trumpeters, to scream, it's a MUST for all high-range acrobats!	flat
Perfect	the double cup facilitates high notes and produces a full sound in the lower and medium registers. THE PERFECT ONE – you simply must have it. I like it!	flat & medium low
